Shoe Soles and Components

Product Features:

- **FlexOfom**® shoe soles and components have a wide range to cater for men, ladies, boys, girls and children shoes.
- **FlexOfom**® shoe soles and components are designed for the latest shoe-line after intensive product development.
- **FlexOfom**® shoe soles and components have excellent product quality, as the manufacturing process adheres to a stringent quality control system.
- The shoe soles are favoured by shoes manufacturers, as the integrated high heel/sliding sheets simplify production and increase productivity.
- The shoe soles have excellent clarity and gloss over a broad spectrum of colours. Together with its multi-coloured or fancy-coloured patterns, **FlexOfom**® shoe soles have wide appeal to shoe customers.
- The shoe soles have reasonable abrasion property to ensure consumers' confidence.
- The shoe soles have good adhesion property to ensure problem-free bonding.
- The shoe soles have low shrinkage and therefore the shoes are destined for export.
- The shoe soles have an excellent texture to match a well-designed shoe upper to make good shoes that fetches higher price and profit.
- **FlexOfom**® shoe soles and components, with its consistent high quality, are good value for money, as the shoes fetch a better price and a higher sale volume.
